PATIO MIST & FOG

THE LEAST EXPENSIVE WAY TO ADD A ROOM TO YOU HOME!

This is not your run of the mill hardware store garden hose system. Let our product specialists help you transform your backyard into a tranquil oasis with a high pressure misting system. We use high quality parts from local vendors here in the valley. All of our mist systems utilize 3/8" stainless steel mist line for better flow ratio vs. the 1/4" line used by many of our competitors. For fog features we custom design copper and high pressure nylon around pools, rock features, planters, and ramadas. Enhance your experience with remote activation and wireless hub controlled by your Android or iOS device.

If you can imagine it, we can help you design it.
